

ULTRASHIELD LIFETIME WARRANTY

When applied according to Ultrashield Corporation recommendations, the active ingredients in Ultraclean Glass™ *CONVERTER* will undergo chemical bonding and become an integral part of the glass panel. This permanently converts the glass to 'non-stick' Ultraclean Glass. When used in conjunction with the after-care cleaner and booster, extensive testing has shown that the special 'repellent' and 'non-stick' properties of Ultraclean Glass will last indefinitely. The after-care cleaner is available for purchase via subscription, and the booster is offered free every 5 years to subscribers. The after-care cleaner and booster are developed by Ultrashield Corporation to the specifications of each finished product manufacturer and offered under the product manufacturer's own label. The after-care cleaner is non-abrasive and will not damage any glass or bathroom surfaces. The booster takes around 10 minutes to apply to a standard-sized shower and only needs to be applied once every 5-10 years to maintain the original performance of Ultraclean Glass.

Ultrashield Corporation warrants that Ultraclean Glass, when converted by a Certified Applicator using new glass, will repel water more than normal glass for the lifetime of the product (provided the after-care products are used regularly according to recommendations). If it is determined that an area of the glass has not remained water repellent, Ultrashield Corporation, through the manufacturer of the finished product, will gladly provide replacement Ultraclean Glass *CONVERTER* in an amount determined to be adequate to re-convert the area.

Consumers with a performance issue related to Ultraclean Glass should contact their product's manufacturer (e.g. the manufacturer of their affected shower enclosure), who have the specific solutions and products to address any performance concern or warranty claim.
